### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Walter Hackler on 7/28/04.

The application has been amended as follows:

Replace claim 1 with the following:

1. A seat cushion comprising: a pair of generally flat pads for supporting a user's buttocks; a hinged handle disposed between the pads for carrying said seat cushion; spaced apart arms, attached to and extending from the pads and said hinged handle, for holding the pads and handle in a spaced apart relationship and enabling grasping of said hinged handle by the user, said arms being flexible for enabling the pads to be oriented in both a planar relationship for supporting the user's buttocks and a folded parallel plane relationship for enabling transport of said seat cushion by the handle, the arms including forearms and aftarms each joined to opposite ends of said hinged handle for holding said hinged handle in a spaced apart relationship with the folded pads; and wherein the pads, arms and hinged handle are integrally molded.

Cancel Claim 3.

Replace claim 8 with the following:

Art Unit: 3677

8. A seat cushion comprising: a pair of generally flat pads for supporting a user's buttocks, the pads having mirror image perimeters; a single hinged handle disposed between the pads for carrying said seat cushion; spaced apart arms, attached to and extending from the pads and said hinged handle, for holding the pads and handle in a spaced apart relationship and enabling grasping of said hinged handle by the user, the arms being flexible for enabling the pads to be oriented in both a planar relationship for supporting the user's buttocks and a folded parallel plane relationship for enabling transport of said seat cushion by the hinged handle, the arms including forearms and aftarms each joined to opposite ends of said hinged handle for holding said hinged handle in a spaced apart relationship with the folded pads; and wherein the pads, arms and hinged handle are integrally molded.

Cancel claim 11.

The following is an examiner's statement of reasons for allowance: the prior art of record discloses or suggests the pads, arms, and a handle to carry the pads, but fails to disclose or suggest that the pads, handle, and arms being integrally molded. The rejection using the combination of Hutchison US2156629 and Grinnell US5297848 teaches the pads, arms, and handle, but does not teach or suggest the pads, arms, and handle being integrally molded. Sweeney US4031578 discloses a contoured travel pillow having pads and an arm that are integrally molded. However, Sweeney fails to disclose or suggest integrally molding forearms, aftarms, and a handle. Therefore the prior art of record fails to anticipate or suggest the inventions of amended claims 1 and 8.
